

THE BULLETIN'S DAILY STORY

ARGUING IT OUT

Having just been refused by her for the eighth time, Cashman regarded Miss Ferguson as unattainable. "But, you know," he said, "you've got to get married some time and you might just as well marry me as any one else."

"You certainly have a good opinion of yourself," observed Miss Ferguson, crushingly.

"In fact," he proceeded calmly, "you might as well marry me now, because I'm a great deal better than you when you come to think of it."

"Why?" the young lady was driven into demanding.

"Well, for one thing, you're in love with me," began Cashman, but that was all he got.

"Well, for one thing, you're in love with me," began Cashman, but that was all he got.

"You're 25," said Cashman, feelingly, as he looked for his hat. "You've been fooling around, wrecking the hearts of susceptible young men for years, and now you're going to get married. You're a sort of recreation for me. All you need is to be let out of the rut and then when I try to jolt you instead of appreciating my benevolent endeavors you go and get mad."

"Do you know that when you are angry your hair fluffs out all around your head just like the feathers of a chicken?" said Miss Ferguson in a deadly tone.

"You're worse than usual tonight! You're absolutely crazy!" "You did it," said Cashman, with his hand on the doorknob. "That's right—revile your own work! Honest, Daisy, don't you like me a little bit?" "Well," said Miss Ferguson sharply, "if I were madly in love with you I'd hate you this minute for being so idiotic! Are you going?"

keep milk from the infected dairy out of the city until the causes of the infection are removed.

The latest step taken in the direction of protecting the city's milk supply is the appointment by the mayor of a commission of physicians to study the whole problem of the distribution and preservation of milk, and this commission has already had one meeting—Philadelphia Record.

Chance for Bettors.

For ten days after election the color of the sky will be a most interesting sight. Here is a chance surely for the man

with a weakness for wagers.—Springfield Republican.

A Notable Character.

A notable character will leave the public stage March 4th next when Senator Beveridge of Indiana will retire to private life. As he is only a little past his 45th birthday, it is extremely probable that he does not contemplate a long retirement. His record has been interesting, and whatever we may think of the wisdom of some of his actions in the senate, it cannot be denied that he has been a noteworthy member of that body, which is usually considered so conservative as to discourage display of the most piquant personalities.

In Every Home

there is sure to come physical suffering at times—suffering hard to bear—suffering which will be followed by serious sickness, if the first symptoms are neglected.

But this suffering will soon be forgotten, and there will be no after consequences if relief is obtained from a safe, reliable, natural corrective medicine,

BEECHAM'S PILLS

ought to be on hand in every home ready for use at first sign of trouble.

This famous family remedy has proved in years and years of trial, its power to correct physical trouble and to ward off disease.

Try for yourself—or in your home, a few doses and see how the bodily system is strengthened and purified, and how surely and effectively they

The Circulation of The Bulletin.

The Bulletin has the largest circulation of any paper in Eastern Connecticut, and from three to four times larger than that of any in Norwich. It is delivered to over 2,000 of the 4,000 houses in Norwich, and to nearly three per cent. of the people. In Wadsworth it is delivered to over 500 houses, in Putnam and Danbury to over 1,100, and in all of the places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and sixty-five postoffice districts, and forty-seven rural free delivery routes. The Bulletin is sold in every town and on all of the U. S. D. routes in Eastern Connecticut.

CIRCULATION

1901, average 4,412

THANKSGIVING DAY.

Proclamation issued by the Governor of Connecticut.

Governor Frank B. Weeks has issued his proclamation for the observance of Thanksgiving, November 24, as a day of Thanksgiving in this state, as follows:

State of Connecticut.

By His Excellency Frank B. Weeks, Governor.

A Proclamation.

For nearly three centuries in our commonwealth there has been set apart a day in each year in which our people might solemnly render to our Almighty God for his manifold blessings.

Following this wise and honored custom, I hereby appoint Thursday, the 24th day of November, as the day of Thanksgiving and upon that day in our homes and places of worship let us reverently express our gratitude to our Creator, and ask the continuance of the favor upon our state and nation, not forgetting to make glad the hearts of the needy and afflicted by deeds of charity and kindness.

Given under my hand and seal of the State at the City of Norwich, this 16th day of November, 1910.

(Seal)

FRANK B. WEEKS.

By His Excellency's Command: MATTHEW D. ROGERS, Secretary.

FAVORING VOTING MACHINES.

It is not surprising that the press representing Connecticut cities are today expressing the hope that voting machines will be adopted at once. With thousands of votes counted out as the result of a trick ballot it is not strange that the immediate need of something better is felt.

The Meriden Journal says on this subject:

"If 153 ballots were thrown out here in last week's election, it means that just as many electors were disfranchised. With the machines every vote will count and there can be no disputes over marked ballots or intention. Everything will show for itself."

"The counting of ballots, always a tedious job, was made much more difficult this time and when in a local contest the election may hinge upon one or two votes there is bound to be trouble and ill feeling. Let's prevent all this by getting machines. They work all right in other cities. Why wouldn't they here?"

There is nothing the matter with the voting machine, as has been repeatedly shown where discrepancies have been claimed. The fault with the machine is that a man who splits his ticket, vote as he pleases, get registered correctly, and the total vote of a precinct may be known the moment the voting stops.

The provision for voting machines in one of the best features in the revised charter of Norwich.

THE SOCIALIST ADVANCE.

The socialist party of Connecticut has not only called attention to itself by having candidates vote at the recent election, but also for its persistent work to promote the cause represented.

The New Haven Journal-Courier concludes an editorial upon this theme as follows:

"The country ought to be spared having a doctrine imposed upon it chiefly through the misconduct of the old parties. In other words, it will be well for the country if all three of the political parties attend to their business in an honorable and conscientious manner. It will then be possible to judge, and to judge intelligently, if the political waves offered by each to the political market."

"It should not be forgotten a moment that while the party of socialism in Connecticut profited this year by the character of its ticket and the earnestness of its campaign, it also profited by the failure of both the republican and democratic parties, in business instances, to keep faith with the people. For the moment we need not fear the party of socialism. What our fear is justified with regard to the political future has to do with the conduct of the parties in power, for now both parties are in power. It is for them to prove their sincerity and usefulness. The battle against exclusive interests is on."

"The Socialist Party declares itself to be the same subject, and says: 'A party that gains over 100 per cent in two years must be reckoned with in making political plans. The socialists jumped from less than \$,000 to more than 10,000, and well satisfied with their showing they will keep up an active campaign all of the time in order to gain new recruits. The socialists do not wait until just before

WOULD KNOW WHOM TO PROD.

From New Haven comes the suggestion that lists be prepared in every city and town, containing the names of voters who failed to vote at the election, just passed. The check lists, of course, show what men failed to go to the polls, and town committees will be pretty likely to secure a record of these, with a view to knowing who to prod to vote two years hence. Thousands of men shirked the responsibility of citizenship this year—so many of them did so, in fact, that it is little wonder there is talk of having a law passed to compel voters to vote, or risk having an extra tax imposed upon them. Non-voters, by the way, are not in a position to criticize the outcome of an election, nor to find fault with the kind of government handed out to them. Here in Ansonia it would be interesting to know whether more republicans than democrats remained away from the polls. This much is known, of democrats there was no serious lack—Ansonia Sentinel.

Why should we always be seeking the man to prod instead of the man to eliminate? The man who does not vote is a man who constantly barters his vote, obtaining money by false pretence, usually is politely referred to as a "floaters." This much is known, of democrats there was no serious lack—Ansonia Sentinel.

EDITORIAL NOTES.

Chauncey Depew is credited with power to forget any unpleasantness that he does not care to remember.

No one is sorry that the price of meat is tumbling and the hope is that all hands may be able to earn the price.

No one thinks that Vice President Sherman's smile is any the less sunny since the election results have been known.

Happy thought for today: The man who is constantly sitting on the fence ought to know the anxious seat when he sees it.

The Newport automobilemen are giving an notice that any patron who shall swear twice shall be elected from their premises.

North Carolina has her canal about finished and the light-draught vessels can now make inside of storm-beaten Cape Hatteras.

Cuba thinks that she needs a navy when she really needs to forget everything pertaining to war and establish a good government.

The freak election bets are being performed in all parts of the country, and they disclose the fact that the fools are not all dead.

The total population of New England is now estimated at six and a half millions, with a prospect some day of being twice that.

There is no use of losing any time in contemplating what Colonel Bryan is going to do in 1912. He cannot do any worse than he has.

The reports concerning the health of Teddy are not making the news, but he is contemplating emigration to Canada seem probable.

The beef trust has not announced the price of turkeys for Thanksgiving, but the best are not expected to be offered less than thirty cents.

The first shipment of Christmas trees from the North is on its way, and the Thanksgiving turkey does not yet know that he is doomed.

A St. Louis man played solitaire and when the game went against him killed himself. He must have had it in for himself from the start.

Tennessee went republican. The voters of that state must have felt that the republicans could be no worse than what they had been accustomed to.

Champ Clark does not expect a tariff commission to make the next revision. He says: "I suppose we will revise it reasonably, cautiously, and wisely."

Governor-elect Dix of New York gives notice that the day he becomes governor, that day he will issue a proclamation. Such good resolutions ought to be more common.

The mayors of New England are to

Infant Mortality.

Milk is the only food for infants, and milk is a very difficult article to keep in perfect condition. Adulteration by water is a relatively trivial danger compared with the infection of milk with the germs of disease. There are gratifying evidences that the department of public health and charities, the modified milk society, the bureau of municipal research, the visiting nurse society, the health and hygiene organizations are working in association to improve the quality of the supply of milk to induce dealers and mothers to take better care of milk and to give instruction in the care of sick babies and to help the mothers care for them. The result of all these efforts is said to be a decrease of 40 per cent. in infant mortality during the past summer. In certain wards where efforts were concentrated.

Director Neff and his assistants are watching the milk brought into the city and when the germs of disease are discovered the dairymen are promptly notified and are required to produce evidence that a sick cow has been isolated from the herd before more milk can be supplied here; or, if typhoid germs appear, measures are taken to
